**Subject: REACH, RoHS and POP compliance declaration**

Dear Customer,

Prysmian Netherlands B.V. acknowledges that the raw materials used in its production processes are subject to the obligations established under REACH Regulation (EC) No 1907/2006.

With regard to Prysmian's finished products, REACH classifies them as follows:

1. Cables (energy and telecom): Articles not intended to release substances under normal or reasonably foreseeable conditions of use.
2. Compounds: Mixtures (preparations).
3. Accessories: Articles not intended to release substances.
4. Optical Fibers: Articles not intended to release substances.

As these products are not considered "substances" under REACH, they are not subject to registration. However, they must be manufactured using substances that have been registered as required by the regulation.

If you believe the products we supply to you fall outside the categories listed above, please inform us so we can perform a specific verification.

Prysmian is actively working to ensure that all raw materials purchased from our suppliers are REACH-compliant and that these substances are registered and authorized where required. In cases where a supplier is found to be non-compliant, Prysmian will take all reasonable measures to ensure continued production and delivery.

REACH also regulates a specific group of hazardous substances known as Substances of Very High Concern (SVHCs). The Candidate List of SVHCs, maintained by the European Chemicals Agency (ECHA), is regularly updated. According to Article 33 of REACH, suppliers of articles must inform customers if any SVHCs are present in concentrations above 0.1% by weight per article.

To the best of our current knowledge, none of the substances on the latest Candidate List (updated June 2025) are present in the articles we supply to you in concentrations exceeding this threshold. Should this situation change, we will promptly inform you in accordance with REACH obligations.

**RoHS Compliance Statement**

Prysmian further confirms that the products supplied to you comply with the RoHS Directive 2011/65/EU, as amended by Directive 2015/863/EU (RoHS 3).

To the best of our knowledge, the products do not contain any of the following ten restricted substances in concentrations exceeding the maximum limits by weight in any homogeneous material:

- Cadmium (Cd): 0.01%
- Lead (Pb), Mercury (Hg), Hexavalent Chromium (Cr<sup>6+</sup>), Polybrominated Biphenyls (PBB), Polybrominated Diphenyl Ethers (PBDE),
- Bis(2-ethylhexyl) phthalate (DEHP), Benzyl butyl phthalate (BBP), Dibutyl phthalate (DBP), Diisobutyl phthalate (DIBP): 0.1% each

**POP Declaration**

Prysmian also declares that, to the best of our knowledge and based on information provided by our suppliers and our internal processes:

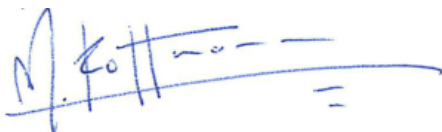

1. No production, use, or processing of substances covered by the POP Regulation (EU) 2019/1021 takes place within our organization.
2. Our products and services do not contain any Persistent Organic Pollutants (POPs) that are banned or restricted under the POP Regulation.
3. Waste streams that may potentially contain POPs are managed and treated in full compliance with applicable European and national legislation.

This declaration has been issued to the best of our knowledge and based on the information currently available.

Prysmian remains committed to ensuring full compliance with applicable EU environmental and product safety regulations.

Best regards,

Prysmian Netherlands B.V.

**Marlies Kottmann**  
Health, Safety and Environmental Director The Netherlands.
